#### About In4Arch

In4Arch is an independent solution  
developer and certified reseller of  
Microsoft Dynamics™ GP software.

## Sales Analyzer

Sales Analyzer makes it easy for anyone—CEO, CFO, Sales Manager, Operations Manager or Clerk—to analyze sales data and generate customized sales reports without the assistance of IT or financial personnel.

Sales, marketing and operations departments will benefit from these capabilities for analysis:

- ✓ Monitor sales order pipeline by salesperson and item;
- ✓ Track sales and profit by multiple groups, including customer, salesperson, or item;
- ✓ Consolidate sales data for Receivables Management, Sales Order Processing, and Invoicing modules;
- ✓ Monitor sales trends by customer or items;
- ✓ Identify those customers that contribute the most to your bottomline; and
- ✓ Monitor current versus prior year sales and profit variance.

## Features

### Sales Analysis

Group sales activity by primary and secondary group — including Year, Customer, Item, State, Salesperson, Sales Territory, Territory Manager, Country, and user defined region.

### Multiple Parameters

- ✓ Document Date or General Ledger Date,
- ✓ All or individual sales modules — Receivables, Sales Order Processing and Invoicing,
- ✓ User defined Regions, and
- ✓ All customers or one customer.

### Report Format

Three report formats are available: Sales Analysis Document Detail, Sales Analysis Summary and Comparison by year(2).
